DEPARTMENT OF COMPUTER SCIENCE

SEMINAR

COMPUTER SCIENCE - IT - MECHATRONICS ENGINEERING - MSCS

November 7, 2018, 6:00-7:00 pm

Bell Tower 2424

Speaker: Frank Lyu

Title: *Aftermath in Cybersecurity – An Introduction to Digital Forensic*

Abstract: This seminar will introduce the concept of forensic science, how it is being adopted in the digital age nowadays, and the role of digital forensics in cybersecurity. Attendees will get a brief insight into daily work-life of a computer forensic examiner and other associated titles and roles. The seminar will end with experience on reviewing authentic job postings and seeking opportunities.

Bio of the speaker: Frank Lyu is a Computer Forensic Examiner, who has been serving in the public sector for the past five years. Previously a tech support, system administrator, and network specialist, he is now a member of a regional Task Force and provides digital forensic assistance to law enforcement agencies. He also holds multiple IT certifications from CompTIA, Microsoft, Fortinet, Cisco, along with several digital forensic certifications.
